EXHIBIT A STATEMENT OF WORK

A. BACKGROUND AND PURPOSE

The California Prison Health Care Receivership Corporation is a non-profit organization created to house activities of the Federal Receiver. United States District Court Judge, Thelton E. Henderson, established the Receivership as the result of a 2001 class action lawsuit (Plata v. Schwarzenegger) brought against the State of California over the quality of medical care in the State's prison system.

All activities of the Receivership have one common purpose: to create a collaborative environment where custody and health care staff improve upon the quality of medical services in California prisons in order to meet constitutional standards while reducing avoidable morbidity and mortality. The Receiver has adopted six goals that are necessary for CDCR's health care program to meet rise to constitutionally acceptable and sustainable levels. The goals are: 1) ensure timely access to health care services; 2) establish a prison medical program addressing the full continuum of health care services; 3) recruit, train and retain a professional quality medical workforce; 4) implement a quality assurance and continuous improvement program; 5) establish medical support infrastructure; and 6) provide for necessary clinical, administrative and housing facilities.

California Prison Health Care Services (CPHCS) has embarked on a number of IT projects necessary to achieve the Receiver's efforts in raising the level of health care of patient-inmates to constitutional standards. Some of these projects include, but are not limited to Clinical Data Repository (CDR), Barcode Medication Administration Record (bMAR), Mental Health Tracking System (MHTS), Census and Discharge Data Information System (CADDIS), and Central Fill Pharmacy. Many of CPHCS healthcare applications are developed using Microsoft .Net Framework, Windows Communication Foundation (WCF) Services, SQL Server database, SQL Server Reporting Services, and SharePoint technologies. CPHCS is embarking on an initiative to migrate these applications to a new data center, and the intent of this solicitation is to seek consulting services to support CPHCS staff during the data center migration.

CPHCS currently has two (2) Microsoft CRM-based applications and a SharePoint server cluster.

The systems, including Production, Stage, Quality Assurance (QA), and Development environments, are composed of all of the following:

1. Twenty-four (24) virtual servers;
 - Deployed using VMWare virtualization software.
 - Supported by HP c7000 blade chassis hardware.
 - Twelve (12) servers running Microsoft Windows Operating System (OS) and various components of Microsoft CRM software suite.
 - Twelve (12) servers running Microsoft Windows Operating System (OS) and various components of Microsoft Office SharePoint Server (MOSS).
2. Four (4) environment iterations; and
 - Production. Requires 24x7 uptime. Hosts housing secured HIPAA data.

- Stage. Serves as a replicated copy of the Production environment. Used as a final pre-deployment QA environment.
 - QA. A low volume environment for testing and quality assurance.
 - Development. The primary environment for application coding, and development testing and debugging.
3. Each environment iteration serves as a deployment of the following:
- MS Dynamics CRM Front End;
 - MS Dynamics CRM Async Workflow;
 - MS Internet Information Services (IIS);
 - MS SQL Server Database;
 - MS SQL Server Reporting Services (SSRS);
 - MS Windows Office SharePoint Front End;
 - MS Windows Office SharePoint Index Crawler; and
 - MS Office integration service.

CPHCS clinical applications shall be deployed into production for a user-base distribution across thirty-three (33) adult-correctional institutions and headquarters. The current clinical applications implementation is located within a privately-operated Tier-III datacenter. Contractor's efforts will support the clinical applications migration to a new publicly-operated Tier-III datacenter with new hardware and infrastructure.

The new clinical applications deployment will be designed and built by CPHCS under the guidance of CPHCS' Clinical Applications Migration Manager. Contractor will support CPHCS' Clinical Applications Solution Architect to migrate Microsoft SQL database components integrated with CPHCS' clinical applications to the new Tier-III datacenter.

All clinical applications migration efforts require extensive collaboration between Developers, Application Architects, Subject Matter Experts (SMEs), Project Managers (PMs), CPHCS management and staff, and other external stakeholders. The migration team including contractors are anticipated to have fifteen personnel in total and will report to CPHCS' Clinical Applications Migration Manager or designee.

CPHCS seeks a consultant or a team of consultants to provide design, development, configuration, testing, deployment, support, maintenance and knowledge transfer activities for Microsoft SQL database migration related to the clinical applications migration. The consultant(s) may work with all major CPHCS Information Technology (IT) projects and collaborate with medical professionals.
