**BOCEPREVIR\*\*\*PRESCRIBING RECOMMENDATIONS** (Abbreviations: BOC: boceprevir; PEG: pegylated interferon; RBV: ribavirin) *\*If on treatment \*\*Only get HCV viral load if this is the final treatment week \*\*\*Nonformulary*

| PATIENT TYPE   | WEEK 8 VIRAL LOAD | WEEK 24 VIRAL LOAD | TREATMENT DURATION  | TOTAL TREATMENT DURATION |
|--|-------------------|--------------------|---|--------------------------|
| Treatment naive  | Undetectable      | Undetectable       | 4 weeks PEG/RBV, then PEG/RBV/BOC for 24 weeks                            | 28 weeks                 |
|  | Detectable        | Undetectable       | 4 weeks PEG/RBV, then PEG/RBV/BOC for 32 weeks, then PEG/RBV for 12 weeks | 48 weeks                 |
| Treatment experienced: null responders, or treatment naive or experienced with compensated cirrhosis; OR all treatment naive or experienced HIV positive |                   | Undetectable       | 4 weeks PEG/RBV, then PEG/RBV/BOC for 44 weeks                            | 48 weeks                 |
| Treatment experienced: prior partial responders or relapsers   | Undetectable      | Undetectable       | 4 weeks PEG/RBV, then PEG/RBV/BOC for 32 weeks                            | 36 weeks                 |
|  | Detectable        | Undetectable       | 4 weeks PEG/RBV, then PEG/RBV/BOC for 32 weeks, then PEG/RBV for 12 weeks | 48 weeks                 |

**BOCEPREVIR FUTILITY RULES**

| HCV VIRAL LOAD COUNT              | ACTION                |
|-----------------------------------|-----------------------|
| WEEK 8 >1000 IU/ml                | DISCONTINUE TREATMENT |
| WEEK 12 >100 IU/ml                | DISCONTINUE TREATMENT |
| WEEK 24 any detectable viral load | DISCONTINUE TREATMENT |

|             |     |
