EXHIBIT A STATEMENT OF WORK

A. BACKGROUND AND PURPOSE

The California Prison Health Care Receivership Corporation is a non-profit organization created to house activities of the Federal Receiver. United States District Court Judge, Thelton E. Henderson, established the Receivership as the result of a 2001 class action lawsuit (Plata v. Schwarzenegger) brought against the State of California over the quality of medical care in the State's prison system.

All activities of the Receivership have one common purpose: to create a collaborative environment where custody and health care staff improve upon the quality of medical services in California prisons in order to meet constitutional standards while reducing avoidable morbidity and mortality. The Receiver has adopted six goals that are necessary for CDCR's health care program to meet rise to constitutionally acceptable and sustainable levels. The goals are: 1) ensure timely access to health care services; 2) establish a prison medical program addressing the full continuum of health care services; 3) recruit, train and retain a professional quality medical workforce; 4) implement a quality assurance and continuous improvement program; 5) establish medical support infrastructure; and 6) provide for necessary clinical, administrative and housing facilities.

CPHCS has embarked on a number of IT projects necessary to achieve the Receiver's goals and raise the level of health care for patient-inmates to constitutional standards. One of these projects is the Clinical Data Repository Project (CDR). Related to CDR is the Clinical Documentation Project (ClinDocs), which provides presentation and form-input functions for CPHCS' clinical IT systems. The CDR system functions as a portal and technology backbone (i.e., Service Oriented Architecture [SOA]) for CPHCS' Electronic Medical Records (eMR). ClinDocs is an Orion Health software solution to automate health care workflow and provide electronic form input capabilities.

To complete implementation of the CDR and ClinDocs system, CPHCS seeks offers from qualified vendors for analysis of current operational work processes, including documentation with specificity for development personnel to design and implement a solution, and provide an interface specification document that includes recommendations for Electronic Medical Record components to interface with CDR portal and Clinical Documentation automated workflow and electronic forms.

The CDR-ClinDocs systems are based on the following core technologies: Orion Health applications, Oracle databases and middleware, OpenDental application, and clinical forms for: 1) Patient Management – Primary Care; 2) Dental; 3) OB/GYN; 4) Mental Health; 5) Public Health; 6) Telemedicine; 7) Allied Health Services; 8) Therapy; 9) Nursing; and 10) Quest laboratory results.

Generally, service Contractors (other than consultant Contractors required to file as above) and their employees shall be required to file an FPPC Form 700 if one of the following exists:

The Contractor shall have a continuing duty to disclose to the State, in writing, all interests and activities that create an actual or potential conflict of interest in performance of the Agreement.

The Contractor shall have a continuing duty to keep the State timely and fully apprised in writing of any material changes in the Contractor’s business structure and/or status. This includes any changes in business form, such as a change from sole proprietorship or partnership into a corporation or vice-versa; any changes in company ownership; any

dissolution of the business; any change of the name of the business; any filing in bankruptcy; any revocation of corporate status by the Secretary of State; and any other material changes in the Contractor's business status or structure that could affect the performance of the Contractor's duties under the Agreement.
