EXHIBIT A STATEMENT OF WORK

A. BACKGROUND AND PURPOSE

The California Prison Health Care Receivership Corporation is a non-profit organization created to house activities of the Federal Receiver. United States District Court Judge, Thelton E. Henderson, established the Receivership as the result of a 2001 class action lawsuit (Plata v. Schwarzenegger) brought against the State of California over the quality of medical care in the State's prison system.

All activities of the Receivership have one common purpose: to create a collaborative environment where custody and health care staff improve upon the quality of medical services in California prisons in order to meet constitutional standards while reducing avoidable morbidity and mortality. The Receiver has adopted six goals that are necessary for CDCR's health care program to rise to constitutionally acceptable and sustainable levels. The goals are: 1) ensure timely access to health care services; 2) establish a prison medical program addressing the full continuum of health care services; 3) recruit, train and retain a professional quality medical workforce; 4) implement a quality assurance and continuous improvement program; 5) establish medical support infrastructure; and 6) provide for necessary clinical, administrative and housing facilities.

The above goals encompass key aspects of CDCR's health care delivery system and the Receiver is undertaking a broad organizational change to improve its mental, dental and health care programs. One Information Technology (IT) project that will support the medical support infrastructure is the End Site Server Data Migration (ESSDM) project. This project involves training IT staff on server administration, migrating institution data files and printers from Windows 2000/2003 servers to Windows 2008 (R2) servers, and working closely with IT institutional staff to coordinate migration schedules.

Institution file/print servers have reached, or are rapidly approaching, the limits of server storage capacity. Many file folders span multiple organizational units complicating consolidation, maintenance, and troubleshooting efforts. Current servers operate the 32-bit Windows Server 2000/2003 platform. Correctional institutions recently received the new 64-bit Windows Server 2008 (R2) platform as part of the first phase of the ESSDM project.

To support execution of the ESSDM project, CPHCS seeks offers for two (2) experienced server migration specialists who will be responsible for training institution staff on server administration, and migrating institutional data from the current platform to Windows Server 2008 (R2).

B. CONTRACTOR QUALIFICATIONS

Contractor must meet the Mandatory Qualifications to be considered for award. Contractors will be evaluated on expertise and experience stated in the resume against the mandatory qualifications. At discretion of CPHCS, interviews may be a part of the selection process.

4. Ability to manage migration of Windows XP and Windows 7 domain clients to new print servers and driver sets;
