Although the Strategic Plan addresses individual aspects concerning the provision of Medical care, it does not speak to the development of an organizational structure at the Institutional level. Without clear definition of the nature of the structure that the Receivership plans on implementing we are left with a "silo" effect of multiple disciplines without a clear sense of the Institution's role and/or leadership in providing care at the local level. This becomes particularly problematic as many individuals within their respective disciplines attempt to define their new roles. Essentially, we approach the difficulty of later imposing a structure in which we have had many "chiefs" attempting to define their roles of influence with conflicting results at the local level.

Thank you,

William F. Alvarez, Ph.D.
