Installation and Implementation

The purpose of this section is to request service costs for installation and implementation of the FCR System in a specified area within the Institutions. Bidder shall be Fuji CR authorized dealer and carry required training certification for all devices included in the SOW. The services shall include project management, functional and technical expertise, and any supplies/parts necessary to ensure operational state of the FCR System and its components.

Bidders must delineate the role for each employee project function including the proposed service(s) and itemized cost(s) in response to the Statement of Work. Bidder will also include in their cost response whether the services are provided by Bidder's personnel or outsourced to third party vendors.

Installation and implementation services shall include, but are not limited to, the following minimum requirements:

- A. Contractor shall provide Fuji-certified service engineers trained to install, configure, integrate, and repair the make and model of FCR System (i.e., equipment) as required by Original Equipment Manufacturer (Fuji).
 - a. Contractor must use Fuji-certified service representatives for installation and implementation of FCR System to ensure: 1) safety to staff and inmate-patients; 2) access to local power, Local Area Network (LAN) or network router integration; 3) integration with other DICOM devices in the institution and CDCR enterprise; and 3) initial end-user configuration of FCR System as requested by the Institutions.

- A. Timeline for install and configuration to date of acceptance testing of FCR System and all components signed-off by CPHCS representative and Contractor;
- B. Successful completion of Acceptance Testing conducted by Institution Supervisor and CPHCS Allied Health Services designee. Acceptance Testing will list all of the key criteria from the SOW; and
- C. Following initial install, a minimum one (1) year warranty of equipment (including all parts), which covers all hardware and software components and service maintenance.
 - a. Contractor is required to provide five (5) year service and maintenance of the System following installation warranty period (i.e., see page 6, item A); and
