Service and Support

Along with all hardware and software system requirements listed above, Contractor's quote must also include all service repairs and preventive maintenance to maintain the optimal level of performance for the System. The service and maintenance requirements listed within "Service and Support" shall apply to all core and peripheral components of the System (e.g. software, hardware, etc.). Contractor's Services shall include, but not limited to, all of the following:

- A. Five (5) year term for Service and Maintenance of the System following the one (1) year of manufacturer's warranty period (parts and labor included);
- B. Service and Maintenance of the System shall be completed by an Original Equipment Manufacturer (OEM) certified engineer(s) authorized to service, support, and maintain the proposed System;
- C. Contractor shall provide a hard copy and digital copy, if available, of the original OEM System manuals, software CD/DVDs, schematic drawings, and any additional OEM documents;
- D. Scheduled maintenance for all components of the System (e.g. software, hardware, etc.) according to the requirements listed by the OEM;
- E. CPHCS requires that Contractor perform annual calibration of the x-ray tube in accordance to CDCR policy and CA State regulations;
- F. For all equipment and peripheral devices that are offline or out of order, Service Repair (SR) examinations shall be required by Contractor within 24-hours of the initial SR call request. This shall require an on-site visit to the institution;
- G. Contractor shall have a permanent service team located in the State of California;
- H. Common replacements parts are to be stocked by Contractor to allow 24-hour response to common repairs;
- I. Contractor shall provide telephone number(s) that are active and staffed twenty-four (24) hours a day, 365 days per year for SR calls initiated by CPHCS staff; and
- J. Contractor shall provide proof of a Quality Assurance (QA) program for tracking and auditing all SR calls initiated by CPHCS staff.

Training

The purpose of this section is to understand the supplemental vendor Training Program fees throughout and after this procurement. The training audience shall include Radiologic

Technologists and supporting imaging staff within the institutions. CPHCS seeks the costs of onsite training that follows the initial equipment install, in addition to the supplemental training required during major equipment component upgrades. Other training options that may be considered include distance learning, Computer-Based Training, and/or web meetings. Proposed Contractor quotes above the listed minimum requirements (i.e., training options) shall be at Contractor's expense.

Contractor training programs include the following minimum requirements:

- A. One (1) 8-hour day of Imaging staff onsite training of the System and all components following the initial installation and acceptance testing;
 - a. As a minimum, System training should include: application training, emergency shutdown procedures, any proprietary QA/QC testing procedures, and system administrative configuration procedures; and
- B. Any training associated with proprietary Service Repair call systems, if applicable.

Room Construction and Installation

The purpose of this section is to understand the costs associated with services required for turnkey installation and implementation of the Contractor's System. Elements of these services include, but are not limited to, Contractor project management, functional, and technical content expertise.

Contractor shall delineate the role for each employee(s) project function including the service and itemized costs included within Contractor's quote. Contractor shall also include cost response whether the services are provided by Contractor's staff or outsourced to third party vendors (i.e., subcontractor). Room Construction and Installation services shall include, but are not limited to, the following minimum requirements:
