| **GRAND TOTALS** | **1478** | | **894** |

• **Beds Occupied:** For each program, identify the total number of patients in the program and the total each custody level, i.e., Level I-IV. Level 1 has placement score of 0-18; Level II 19 through 35; Level III 36-59; and Level IV 60 and above. Patients with "no score" have not completed Reception Center Processing. PC 1370 patients are considered incompetent to stand trial and do not have a concurrent ICF referral. WIC 7301 also do not have concurrent ICF referral and are too dangerous for a State Hospital facility -- enhanced custody/security needs of a patient can best be met in a CDCR Institution. Dual Treatment Patients who have both WIC 7301/PC 1370 and PIP referrals are counted only once in the bed census because they occupy the same bed, with the PIP referral taking precedence.
• **DSH-Atascadero:** The full complement of beds at DSH-Atascadero are reflected under the Intermediate Low-Custody bed capacity. The Acute census includes patients admitted for Acute care at DSH-Atascadero after an individualized review of patient's clinical need, bed availability, patient's least restrictive housing designation, and patient's likelihood of stepping down to Intermediate care at DSH-Atascadero or DSH-Coalinga upon the determination by the treatment team of clinical appropriateness for discharge from Acute Care.
• **Total Out of LRH (Least Restrictive Housing):** Least Restrictive Housing (LRH) is determined by CDCR. The numbers of patients identified as out of LRH for High Custody Programs include those whose LRH is for Multi-person Cells.
