

### APPENDIX 5: COVID-19 CASE AND CONTACT SHAREPOINT REPORTING TOOL

#### **1. DAILY CASE LINE LIST REPORTING IN SHAREPOINT**

During the COVID-19 pandemic, the California Correctional Health Care Services (CCHCS) institutions shall report to the Public Health Outbreak Surveillance COVID-19 SharePoint by the next business day all cases of COVID-19 among patients where the positive test for diagnosis was performed at an outside lab (community hospitals, public health labs) and all false-positive test results as determined by the institution CME or Chief P&S.

# 2. DEFINITIONS TO GUIDE REPORTING

### CONFIRMED CASE

A positive laboratory test for the virus that causes COVID-19 in at least one respiratory specimen. A positive antigen test should be reflexively confirmed using a molecular test.

#### SUSPECTED CASE

Acute illness compatible with COVID-19 of unknown etiology without a conclusive test result for the virus that causes COVID-19.

#### ACUTE ILLNESS COMPATIBLE WITH COVID-19

Either (1), (2), or (3), in the absence of a more likely diagnosis:

(1) Acute onset or worsening of at least two of the following symptoms or signs: fever (measured or subjective); chills; rigors; myalgia; headache; sore throat; nausea or vomiting; diarrhea; fatigue; or congestion or runny nose; OR

(2) Acute onset or worsening of any one of the following symptoms or signs: cough; shortness of breath; difficulty breathing; olfactory disorder; taste disorder; confusion or change in mental status; persistent pain or pressure in the chest; pale, gray, or blue-colored skin, lips, or nail beds, depending on skin tone; or inability to wake or stay awake; OR

(3) Severe respiratory illness with at least one of the following: clinical or radiographic evidence of pneumonia, or acute respiratory distress syndrome (ARDS).

#### **RE-POSITIVE TEST**

A positive test for SARS-COV-2 (the virus that causes COVID-19) in a patient who has previously tested positive.

#### FALSE POSITIVE TEST

A test which incorrectly indicated that a virus was present. A positive test for the virus that causes COVID-19 may be determined to be a false positive by the laboratory performing the test (e.g., Quest Diagnostics), the institution Chief Physician and Surgeon (CP&S), or the Chief Medical Executive (CME); see "Concern for COVID-19 False-Positives: What to Do" subsection in the <u>Testing</u> section.

#### 3. SHAREPOINT REPORTING REQUIREMENTS

The following events require next business day reporting to the COVID-19 SharePoint: <u>https://cdcr.sharepoint.com/sites/cchcs\_ms\_phos (CDCR networking is required for access).</u>

- Cases where the positive test for diagnosis was performed at an outside lab (community hospitals, public health labs).
- False-positive test result determinations. (Note that a first-ever positive test result from Quest or a positive point of care [POC] test performed at the institution will auto-generate records in SharePoint. This record may be used to report a false positive test result.)

#### **4. RESOLVING CASES IN SHAREPOINT**

Cases are resolved in the Quality Management (QM) Monitoring Registry based on the date of the first positive test, active isolation orders, and out-to-medical status. Cases no longer need to be resolved in SharePoint.

#### 5. REPORTING FALSE POSITIVES TO SHAREPOINT

False positives (as determined by the institution CME or CP&S or by the lab) must be documented in the medical record by the CME or CP&S or designee and then reported to SharePoint (see the Concern for COVID-19 False Positives: What to Do subsection in the <u>Testing</u> section).

Enter the specimen collection date and test result (positive). Enter the date of release from isolation. Select the *Reason case closed* as "False positive documented by CME or CP&S; not a case."

CCHCS data systems will then ignore positive tests collected on that date for that patient when determining the patient's COVID-19 status. The date in the SharePoint report must match the date of the positive test in other CCHCS data (e.g., from Quest or the influenza-like illness (ILI) POC Results PowerForm) for the status to update correctly. The positive result on that date will be listed as "DETECTED (Possible False Positive)" in the patient's Lab Results Report in the QM COVID-19 monitoring registry historical Lab Results Report. These data systems changes will occur no sooner than 5 days after the collection date to allow time for false positive case determinations and documentation in the medical record.

#### 6. REPORTING RESOLVED CASES IN RETURNING PATIENTS

When a patient with confirmed active COVID-19 is released from CDCR prior to meeting the criteria for release from isolation (e.g., unresolved) and later returns to CDCR, the patient will **no longer** initially show in the COVID-19 monitoring registry with a status of Confirmed Active, because of the new reliance of the QM registry on time since the first positive test, active isolation orders, and out-to-medical status for determining active/resolved status. Therefore, no action is needed in SharePoint.

#### 7. REQUESTING RECORD DELETION

SharePoint users in the institutions can update but not delete records. To request deletion of a duplicate record or a record entered in error, change the CDCR number to "DELETE". Send an email to <u>Sharon.Albers@cdcr.ca.gov</u> and cc <u>Amber.JonesHarvel@cdcr.ca.gov</u>.

Subject line: "Requesting deletion of PH SharePoint record\_<institution>"

Include the date of report, reporting institution, and the patient's last name in the email message.

#### **8. REPORTING IN SHAREPOINT**

From https://cdcr.sharepoint.com/sites/cchcs\_ms\_phos, click on your institution.

# 9. DATA DICTIONARY

#### COVID-19 CASES SUSPECTED AND CONFIRMED

Field	<b>Definition / Instruction</b>
Date of report	The date that the suspect or confirmed case-patient was initially reported. This field is auto-populated and should not be edited.
Reporting institution	The default value (auto-populated) is the hub institution. If the patient is at a Community Correctional Facility (CCF), select the CCF from the drop- down menu.
CDCR number Patient last name Date of birth	In addition to the CDCR number, enter the patient's last name and date of birth. These identifiers are needed to identify the patient correctly and link to other CCHCS data and the Quality Management (QM) COVID-19 Monitoring tool. Enter the birth date in M/D/YYYY format.
Housing assignment yard Housing assignment building Housing assignment tier Housing assignment cell bed bunk	Enter the patient's housing location (optional, for institutional use). Usually, the cell bed or number is a 3-digit number. In some cases, it may be followed by a single letter representing an upper or lower bunk (U or L).
COVID-19 test for diagnosis	Select an option from the drop-down list to record the result or status of the COVID-19 test used for diagnosis. Sometimes nasopharyngeal (NP) and oropharyngeal (OP) swabs may be collected and tested separately. If ANY specimens tested positive, select Positive. If ALL specimens tested negative, select Negative. Other options include Pending, Refused, Not tested-Probable case within outbreak, or Not tested-Other. Do <b>not</b> update this value later as a patient with a confirmed case is re-tested as part of a strategy to release from isolation.
COVID-19 test laboratory	Select an option from the drop-down list to record where the test for diagnosis of COVID-19 is or was performed. The options are Quest Diagnostics, Outside hospital lab, Local public health lab, State public health lab, Point of Care, Other. [Are there other labs to include?]
COVID-19 test type	Select an option from the drop-down list to record the type of test. The options are PCR (NAAT), Antigen test, Viral culture, Antibody test, or Other test.
COVID-19 collection date	Enter the date that the specimen was collected for the tested used for the diagnosis of COVID-19. Do <b>not</b> update this value later as a patient with a confirmed case is re-tested as part of a strategy to release from isolation.
Respiratory pathogen co-infection	Select any respiratory pathogens, confirmed by laboratory testing, present while the patient was infected with the virus that causes COVID-19. The options are: No co-infection, Influenza A, Influenza B, RSV, Other co- infection.
Symptoms	Select all symptoms that apply at any time during this illness from the drop-down list. The options are: Cough (new onset or worsening of chronic cough), Shortness of breath (dyspnea), Fever >100.4F (38C), Subjective fever (felt feverish), Other symptoms not listed above, Asymptomatic, Unknown. Only select Asymptomatic if the patient has not had any symptoms of COVID-19 at any time during their infection.
Date of symptom onset	Enter the first date that the patient had any of the symptoms associated with COVID-19. Enter the date in M/D/YYYY format.
Date of symptom resolution	Enter the last date that the patient had any of the symptoms checked above. Enter the date in M/D/YYYY format.
Close contact	In the 14 days prior to symptom onset, did the patient have close contact with a confirmed case of COVID-19? Refer to the current COVID-19 guidance for definitions of close contact. Select an option from the drop- down list.
Cluster of influenza-like illness (ILI)	Is the patient linked to a cluster of ILI? Select a response from the drop- down list.
Patient hospitalized (outside hospital)	Has the patient been hospitalized at an outside hospital for this illness? Select an option from the drop-down list.

Field	<b>Definition / Instruction</b>
Hospital name	If the patient was admitted to an outside hospital or seen in the emergency room (ER), enter the hospital's name.
Hospital level of care	Select the <u>current</u> level of care (LOC) for the patient at an outside hospital from the drop-down menu (e.g., intensive care unit – ICU, ICU/Vent, Telemetry, Med/Surg, ER).
Hospital admission date	Enter the date the patient was admitted to the hospital. Enter the date in M/D/YYYY format.
Hospital discharge date	Enter the date the patient was discharged from the hospital. Enter the date in M/D/YYYY format.
Return placement LOC	Select the level of care of the patient when they returned to the institution from the hospital (e.g., correctional treatment center - CTC, outpatient housing unit - OHU, skilled nursing facility - SNF, Housing Unit) from the drop-down menu.
Isolation status	Select the patient's current isolation status (e.g., alone in Airborne Infection Isolation Room - AIIR, at an outside hospital, released from isolation) from the drop-down list.
Date isolation began	Enter the date the patient was isolated. Enter the date in M/D/YYYY format.
Date released from isolation	Enter the date the patient was released from isolation. Enter the date in M/D/YYYY format.
	If the case has been closed, select the reason from the drop-down menu. The options are:
Reason for closing case	<ul> <li>COVID-19 ruled out through testing or an alternative diagnosis</li> <li>Confirmed case, the patient recovered and was released from isolation</li> <li>Confirmed case, the patient died</li> <li>Patient transferred to another CDCR institution</li> <li>Transferred to another agency (e.g., Bureau of Prisons - BOP, Immigration and Customs Enforcement - ICE, Department of State Hospitals - DSH)</li> <li>Released from CDCR (e.g., parole, discharge)</li> <li>False positive documented by CME or CP&amp;S not a case</li> <li>Patient returned to CDCR &gt;21 days from positive test; case resolved</li> <li>Other</li> </ul>
Transfer institution	If the patient was transferred to another institution or CCF before COVID- 19 was ruled out or, if confirmed, before recovery, select the institution or CCF from the drop-down list.
Date case closed	Enter the date that the case was closed in M/D/YYYY format. This is the date that the closure was entered into SharePoint.
Modified	The auto-populated date and time of the most recent edit/update to the report. This date/time cannot be edited by the user.
Modified by	The auto-populated user who last edited the report. This entry cannot be edited by the user.

### COVID-19 CONTACTS – NO LONGER REQUIRED

Field	Definition / Instruction
Date of report	Date that the contact to a confirmed case of COVID-19 was initially reported. This field is auto-populated and should not be edited.
Reporting institution	The default value (auto-populated) is the hub institution. If the patient is at a CCF, select the CCF from the drop-down menu.
CDCR number Patient last name Date of birth	In addition to the CDCR number, enter the patient's last name and date of birth (M/D/YYYY). These identifiers are needed to identify the patient correctly and link to other CCHCS data and the QM COVID-19 Monitoring tool. Enter the birth date in M/D/YYYY format.
Housing assignment yard Housing assignment building Housing assignment tier Housing assignment cell bed bunk	Enter the patient's housing location (optional, for institutional use). Usually, the cell bed or number is a 3-digit number. In some cases, it may be followed by a single letter representing an upper or lower bunk (U or L).
Type of contact	Select all reasons that apply to the current quarantine from the drop-down list. Use "close contact" as defined by the current COVID-19 guidance. The options are:
	<ul> <li>Close contact with confirmed COVID-19 case</li> <li>Close contact with suspected COVID-19 case</li> <li>Not a contact to COVID-19</li> <li>Other</li> </ul>
Date of last exposure	This date is used to calculate the end of the quarantine period. This value must be updated if the patient is re-exposed to COVID-19. Enter the date in $M/D/YYYY$ format.
Quarantine start date	Enter the earliest date that the patient was placed on quarantine. Enter the date in M/D/YYYY format.
Quarantine end date	Enter the anticipated (future) or actual (past) end date of the quarantine for this patient. Enter the date in M/D/YYYY format.
Type of quarantine	How is (or was) the patient being quarantined. Select an option from the drop-down list.
Reason quarantine ended	<ul> <li>Select all options that apply for the reason(s) the patient's quarantine ended from the drop-down list. The options are: <ul> <li>14 days without re-exposure, did not develop COVID-19</li> <li>Confirmed diagnosis of COVID-19</li> <li>Determined not to be a contact</li> <li>Transferred to another CDCR institution</li> <li>Transferred to another agency (e.g., BOP, ICE, DSH)</li> <li>Released from CDCR (e.g., paroled, discharged)</li> <li>Other</li> </ul> </li> </ul>
Transfer institution	If the patient transferred to another CDCR institution or CCF before completing quarantine, select the institution or CCF from the drop-down list.
Modified	The auto-populated date and time of the most recent edit/update to the report. This date/time cannot be edited by the user.
Modified by	The auto-populated user who last edited the report. This entry cannot be edited by the user.

10. REQUESTING ACCESS TO THE COVID-19 SHAREPOINT

- 1. Visit the URL for the SharePoint: <u>https://cdcr.sharepoint.com/sites/cchcs\_ms\_phos</u>.
  - a. If you do not have access, an error message will display.
  - b. Click on **Request access**.

8	Error: Access Denied	×
	You are current User Sign in as a different user Request access	
	Go back to site	

- 2. After you submit your access request, you may be contacted by a member of the SharePoint administration team asking what type of access you need. Respond that you need read-write access, and specify which institution.
- 3. Verify access by visiting the URL for the SharePoint: <u>https://cdcr.sharepoint.com/sites/cchcs\_ms\_phos</u>.
