

WHAT IS THE HEALTH CARE SERVICES DASHBOARD?

The Health Care Services Dashboard is a monthly report that:

- Consolidates key performance indicators and other important organization metrics across health care programs and service areas.
- Provides information typically monitored by health care organizations, such as patient outcomes, access to care, and utilization and cost.
- Helps the organization regularly assess progress in meeting annual performance objectives.
- Helps health care executives and managers identify areas that may need improvement.

The Dashboard Glossary is currently being updated to comply with new ADA regulations. If you would like to request a copy, please email us at: QMStaff@cdcr.ca.gov

The Dashboard is intended to support headquarters and institution staff in identifying opportunities for improvement and monitoring progress toward performance objectives. However, there are limitations to the information - California Correctional Health Care Services (CCHCS) has standardized many data collection processes, provided training to promote consistency in data reporting, and invested in information system modifications to improve data quality. However, much of the data featured in the Health Care Services Dashboard is gathered through multiple networked databases or self-reported by institutions, and some of the data has not been validated or verified. Performance objectives and benchmarks were generated internally for quality improvement purposes and are not necessarily intended to reflect compliance with court mandates or a determination regarding constitutional levels of care.
